### **DETAILED ACTION**

A request for continued examination under 37 CFR 1.114, including the fee set forth in 37 CFR 1.17(e), was filed in this application after final rejection. Since this application is eligible for continued examination under 37 CFR 1.114, and the fee set forth in 37 CFR 1.17(e) has been timely paid, the finality of the previous Office action has been withdrawn pursuant to 37 CFR 1.114. Applicant's submission filed on April 25, 2003 has been entered. Claims 1-11 are pending.

### ***Claim Rejections - 35 USC § 112***

The following is a quotation of the first paragraph of 35 U.S.C. 112:

The specification shall contain a written description of the invention, and of the manner and process of making and using it, in such full, clear, concise, and exact terms as to enable any person skilled in the art to which it pertains, or with which it is most nearly connected, to make and use the same and shall set forth the best mode contemplated by the inventor of carrying out his invention.

Claim 8 is rejected under 35 U.S.C. 112, first paragraph, because the specification, while being enabling for "substances effective against acne", does not reasonably provide enablement for "astringents" or "antimicrobially effective substances". The specification does not enable any person skilled in the art to which it pertains, or with which it is most nearly connected, to make and use the invention commensurate in scope with these claims.

### ***Double Patenting***

The nonstatutory double patenting rejection is based on a judicially created doctrine grounded in public policy (a policy reflected in the statute) so as to prevent the unjustified or improper timewise extension of the "right to exclude" granted by a patent and to prevent possible harassment by multiple assignees. See *In re Goodman*, 11 F.3d 1046, 29 USPQ2d 2010 (Fed. Cir. 1993); *In re Longi*, 759 F.2d 887, 225 USPQ 645 (Fed. Cir. 1985); *In re Van Ornum*, 686 F.2d 937, 214 USPQ 761 (CCPA 1982); *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970); and, *In re Thorington*, 418 F.2d 528, 163 USPQ 644 (CCPA 1969).

Art Unit: 1617

A timely filed terminal disclaimer in compliance with 37 CFR 1.321(c) may be used to overcome an actual or provisional rejection based on a nonstatutory double patenting ground provided the conflicting application or patent is shown to be commonly owned with this application. See 37 CFR 1.130(b).

Effective January 1, 1994, a registered attorney or agent of record may sign a terminal disclaimer. A terminal disclaimer signed by the assignee must fully comply with 37 CFR 3.73(b).

Claims 1-11 are rejected under the judicially created doctrine of obviousness-type double patenting as being unpatentable over claims 11-3, 6-11, and 14-17 of U.S. Patent No. 6592883 B1.

The '833 patent claims a cosmetic composition comprising an oil phase, water phase, and a combination of amphiphilic phyllosilicate and boron nitride, and at most 0.5 % by weight of one or more emulsifiers. The '883 patent also claims the emulsion devoid of emulsifier, see instant claim 2. The patent further claims the limitations on cosmetic additives, the amount of boron nitride, metal oxides, astrigent or antibacterial components, and antioxidants. See instant claims 3-8, 10, and 11. While the patent does not recite the particle size of the boron nitride, the specification indicates that the amphiphilic boron nitride particle used in the invention has less than 15 microns. See p. 6, lines 27 – 49. See instant claims 5 and 9.

While the claims do not recite "Pickering emulsion", examiner notes that "pickering emulsion" is defined as an emulsion stabilized by solids and without emulsifiers, which is what the prior art composition appears to be. See '883, p. 3, lines 26 – 30. Examiner views that the solid particles in the patent and the instant invention both function to stabilize the emulsions and thus both compositions function prior art

Art Unit: 1617

emulsion is obviously a "pickering emulsion" because the patented composition comprises same components as recited in the instant invention.

Although the conflicting claims in the '833 patent and the instant claims are not identical, they are not patentably distinct from each other because both sets of claims claim compositions having overlapping limitations.
